## *30 years of Singphoniker speak for themselves.*

The Singphoniker have mastered the art of presenting rich musical content with lightness and ease and of providing meaning to the seemingly simple. In 2012, the most renowned German vocal ensemble will celebrate its 30<sup>th</sup> birthday in its current line-up.

In the small circle of worldwide active vocal ensembles the Singphoniker possess a distinctive profile. Their huge repertoire extends from the Renaissance up to the present and covers the areas of classical and popular music – in the area of romanticism they are considered *the* reference interpreters.

Their unique ensemble sound is warm, finely balanced to powerful, and reflects from the deepest darkness up to the most beaming light every facet of a male cast. In concert, their devotion to music and joy of singing are carried over directly to their audiences: Six voices, united in the goal to create a musical appeal which touches and carries you away.
